

This is my private tenant settings – Power BI Pro

Admin portal

The screenshot shows the 'Tenant settings' page in the Power BI Admin portal. The left sidebar lists various settings categories, with 'Tenant settings' selected. The main content area displays a list of settings, each with a right-pointing arrow icon. The 'Download reports' setting is circled in yellow. It is currently 'Disabled for the entire organization'.

Setting	Status
Allow Azure Active Directory guest users to access Power BI	Enabled for the entire organization
Invite external users to your organization	Enabled for the entire organization
Allow Azure Active Directory guest users to edit and manage content in the organization	Enabled for the entire organization
Show Azure Active Directory guests in lists of suggested people	Enabled for the entire organization
Publish to web ⓘ	Enabled for the entire organization
Copy and paste visuals	Enabled for the entire organization
Export to Excel	Enabled for the entire organization
Export to .csv	Enabled for the entire organization
Download reports	Disabled for the entire organization

I tried simple copy Reports run and below is the error I got it is pretty much same as what I could see
